Being wholly or mostly meatless doesn't have to mean sacrificing nutrition or performance—in fact, these whole-food recipes can help bring your body to peak health and fitness. Written by Heather Mayer Irvine, the Food and Nutrition editor of *Runner's World*, this vegetarian cookbook not only contains healthy recipes but also in-depth information on how runners—regardless of their food-with-a-face preference—can eat more plants. In this cookbook, you'll find delicious and nutritious recipes for every meal (and yes, even dessert!) that will help power your runs and recovery.

Nielsen and Tillisch have tried-and-tested experience inside the world of grand ambitions. He is the co-author of *Leadership at Scale* and has published several articles on personal development. He is currently based in New York with his wife, Samira, and their two dogs, Napoleon and Caesar. Rachel Swaby and Kit Fox present *Mighty Moe*, the untold true story of runner Maureen Wilton, whose world record-breaking marathon time at age 13 was met first with misogyny and controversy, but ultimately with triumph. Fifty-two years ago, a girl known as *Mighty Moe* broke the women's world marathon record at a small race in Toronto. This was an era when girls and women were discouraged from the sport and the longest track event at the Olympics for women was 25.6 miles shorter than a marathon. Thirteen-year-old *Moe's* world-beating victory was greeted with chauvinistic disapproval and accusations of cheating—as were many of her achievements in the sport she had excelled at from the age of ten. Within less than two years, the controversy took its toll and Maureen quit running. Here is the untold story of *Mighty Moe's* tenacity and triumph in the face of adversity as a young athlete—and of a grown-up Maureen finding her way back to the sport decades later. This inspiring biography for readers and racers of all ages showcases the truly groundbreaking achievements of an unassuming, amazing young athlete. *Mighty Moe* includes an introduction by Kathrine Switzer, the first woman to officially register and run in the Boston Marathon (and Maureen's only fellow female competitor at the 1967 record-setting race), and an afterword by Des Linden, the first-place finisher of the 11,628 women who raced the 2018 Boston Marathon.

Run the Way You Were Born to Run Every runner wants a smooth, light, powerful, and resilient stride. But there isn't one ideal form all runners should try to emulate. Instead, research and experience show that people can run effectively in a wide variety of patterns with some universal elements. In lively, accessible prose, author Jonathan Beverly details his search for common ground among physical therapists, podiatrists, biomechanics researchers, and coaches, and reveals how individual runners can apply those

principles and improve their performance, avoid injury, and enhance their enjoyment on the run. With specific, illustrated exercises that show how to counteract tight muscles from excessive sitting, improve limited arm mobility from hunching over electronic devices, strengthen your feet for better balance, and improve speed by lengthening your stride, *Runner's World Your Best Stride* is an approachable guide to human movement and a practical tool for improved running performance.

Draws on the latest scientific advice to provide an up-to-date nutrition reference specifically tailored to the needs of runners, covering such topics as proper hydration, customizing a diet for personal training needs, and speeding up recovery times. Original. 15,000 first printing.

From the best-selling author of *The Wind-Up Bird Chronicle* and *After Dark*, a rich and revelatory memoir about writing and running, and the integral impact both have made on his life. In 1982, hav-

ing sold his jazz bar to devote himself to writing, Haruki Murakami began running to keep fit. A year later, he'd completed a solo course from Athens to Marathon, and now, after dozens of such races, not to mention triathlons and a slew of critically acclaimed books, he reflects upon the influence the sport has had on his life and—even more important—on his writing. Equal parts training log, travelogue, and reminiscence, this revealing memoir covers his four-month preparation for the 2005 New York City Marathon and includes settings ranging from Tokyo's Jingu Gaien gardens, where he once shared the course with an Olympian, to the Charles River in Boston among young women who outpace him. Through this marvellous lens of sport emerges a cornucopia of memories and insights: the eureka moment when he decided to become a writer, his greatest triumphs and disappointments, his passion for vintage LPs, and the experience, after the age of fifty, of seeing his race times improve and then fall back. By turns funny and sobering, playful and philosophical, *What I Talk About When I Talk About Running* is both for fans of this masterful yet guardedly private writer and for the exploding population of athletes who find similar satisfaction in distance running.

As a runner, your biggest asset (or sometimes your greatest enemy) is your brain. What you think and feel on and off the road also has a huge influence over how you perform once you lace up. *Runner's World The Runner's Brain* shows you how to unlock and capture the miraculous potential of the body's most mysterious and intriguing organ and rewire your mind for a lifetime of athletic success. The book is based on cutting-edge brain science and sports psychology that author Dr. Jeff Brown uses every day in his private practice and as part of the medical team of several major road races including the Boston Marathon. Full of fascinating insights from runners of all abilities—including champion marathoner Meb Keflezighi and other greats—the book includes trustworthy information that's been proven to work both in the lab and on the road.

Conversely, when we try hard to create the right conditions for that perfect run, it often doesn't come about. In *The Perfect Run*, Mackenzie L. Havey reveals everyone has the potential to enjoy more joyful and flow-driven running, no matter your experience, pace, or sporting ambitions. Charlie Engle's "fascinating account of the high and low points of his life as an ultramarathon runner...is uplifting and inspirational" (*Publishers Weekly*) as he describes his globe-spanning races, his record-breaking run across the Sahara Desert, and how running helped him overcome drug addiction—and an unjust stint in federal prison. After a decade-long addiction to crack cocaine and alcohol, Charlie Engle hit bottom with a near-fatal six-day binge that ended in a hail of bullets. As Engle got sober, he turned to running, which became his lifeline, his pastime, and his salvation. He began with marathons, and when marathons weren't far enough, he began to take on ultramarathons, races that went for thirty-five, fifty, and sometimes hundreds of miles, traveling to some of the most unforgiving places on earth to race. The Matt Damon-produced documentary, *Running the Sahara*, followed Engle as he led a team on a harrowing, record-breaking 4,500-mile run across the Sahara Desert, which helped raise millions of dollars for charity. Charlie's growing notoriety led to an investigation and a subsequent unjust conviction for mortgage fraud for which he spent sixteen months in federal prison in Beckley, West Virginia. While in jail, Engle pounded the small prison track, running endlessly in circles. Soon his fellow inmates were joining him, strug-

gling to keep their spirits up in dehumanizing circumstances. In *Running Man*, Charlie Engle tells the surprising, funny, and emotional story of his life, detailing his setbacks and struggles—from coping with addiction to serving time in prison—and how he blazed a path to freedom by putting one foot in front of the other. "A fast-paced, well-written account of a man who accepts pain, pushes beyond imagined limits, and ultimately finds redemption and peace" (*Booklist*), this is a raw and triumphant account about finding the threshold of human endurance, and transcending it.

An updated edition of an authoritative running guide, edited by the winner of the 1968 Boston Marathon, explains key fitness and nutritional practices, providing coverage of everything from proper hydration and selecting appropriate footwear to improving endurance and marathon training. Original.

Peter Sagal, the host of NPR's *Wait Wait...Don't Tell Me!* and a popular columnist for *Runner's World*, shares "commentary and reflection about running with a deeply felt personal story, this book is winning, smart, honest, and affecting. Whether you are a runner or not, it will move you" (*Susan Orlean*). On the verge of turning forty, Peter Sagal—brilliant Harvard grad, short bald Jew with a disposition towards heft, and a sedentary star of public radio—started running seriously. And much to his own surprise, he kept going, faster and further, running fourteen marathons and logging tens of thousands of miles on roads, sidewalks, paths, and trails all over the United States and the world, including the 2013 Boston Marathon, where he crossed the finish line moments before the bombings. In *The Incomplete Book of Running*, Sagal reflects on the trails, tracks, and routes he's traveled, from the humorous absurdity of running charity races in his underwear—in St. Louis, in February—or attempting to "quiet his colon" on runs around his neighborhood—to the experience of running as a guide to visually impaired runners, and the triumphant post-bombing running of the Boston Marathon in 2014. With humor and humanity, Sagal also writes about the emotional experience of running, body image, the similarities between endurance sports and sado-masochism, the legacy of running as passed down from parent to child, and the odd but extraordinary bonds created between strangers and friends. The result is "a brilliant book about running...What Peter runs toward is strength, understanding, endurance, acceptance, faith, hope, and charity" (*P.J. O'Rourke*).

"A must-have for any woman targeting the distance." —Runner's World A no-nonsense, interactive guide that empowers all women at all levels to run their strongest, best marathon ever As recently as 1966, women were forbidden to run in the marathon. Professionals—including doctors—believed it was physically impossible and dangerous for women to run more than a mile and a half. But as with many other barriers women have faced over time, we fought our way in. Today, women make up almost half of the marathoning population. Yet most marathon training manuals are written by men. And while these men are experts when it comes to how men can and should train, women need training programs tailored to our bodies—to our unique strengths and weaknesses—so that we can avoid injuries and run at our peak. The programming in this book was created by a woman, specifically for women. Master the Marathon is a comprehensive guide to marathon training for women at all levels of running—beginner, intermediate, and advanced. The book takes you through everything you need to know to be prepared for the 26.2 miles of the marathon, including detailed training plans, strength training programs, building your mental awareness of your physical body, nutrition, guidance on finding the best marathon for you, identifying and avoiding potential injuries, inspirational advice, and other unexpected pieces of wisdom. Both incredibly practical and deeply motivating, Master the Marathon will help you unlock the strength and determination inside you to embark on the spectacular journey that is the marathon.

NEW YORK TIMES BESTSELLER Deena Kastor was a star youth runner with tremendous promise, yet her career almost ended after college, when her competitive method—run as hard as possible, for fear of losing—fostered a frustration and negativity and brought her to the brink of burnout. On the verge of quitting, she took a chance and moved to the high altitudes of Alamosa, Colorado, where legendary coach Joe Vigil had started the first professional distance-running team. There she encountered the idea that would transform her running career: the notion that changing her thinking—shaping her mind to be more encouraging, kind, and resilient—could make her faster than she'd ever imagined possible. Building a mind so strong would take years of effort and discipline, but it would propel Kastor to the pinnacle of running—to American records in every distance from the 5K to the marathon—and to the accomplishment of earning America's first Olympic medal in the marathon in twenty years. Let Your Mind Run is a fascinating intimate look inside the mind of an elite athlete, a remarkable story of achievement, and an insightful primer on how the small steps of cultivating positivity can give anyone a competitive edge.
