Saxon math programs produce confident students who are not only able to correctly compute, but also to apply concepts to new situations. These materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Each grade level has its own consumable meeting book, which is used during The Meeting at the beginning of each day. This first edition meeting book is for Grade 1.

Provides all the facts practice one student needs in an academic year. The Facts Practice Workbook helps reinforce students' recall of basic facts and eliminates the need for costly and time-consuming photocopying.

"Included with the new Teacher's Manual, the Intervention Teaching Guide provides support for Saxon Math 5/4-8/7 students requiring intervention. The guide offers enhanced teaching strategies and program implementation strategies that help students working at different levels succeed."

"Saxon math is structured to help every student be a successful mathematics learner. It provides the time students need to discover, master, and apply mathematical concepts. The structure of Saxon math puts students heads about the rest."--Page 4 of cover.

Includes step-by-step solutions for all Lesson Practice and Mixed Practice problems.

Physics is equally appropriate for average and gifted students. The entire program is based on introducing a topic to a student and then allowing them to build upon that concept as they learn new ones.
