"Milady's Hair Care Product Ingredients Dictionary" is written using the International Nomenclature Cosmetic Ingredient (INCI) system, the commonly accepted nomenclature for all cosmetic products, and the name most likely to appear on the Material Safety Data Sheets (MSDS) and the product's label. Common names are also included with definitions and referenced to the INCI name.

Everything you need to know about the safety and efficacy of cosmetics and cosmeceuticals. Is it a cosmetic? A drug? A nutrient? It's becoming more and more difficult to tell the difference with the cosmetic companies combining the three. And unlike with food additives, the FDA has little control over what goes into the products that claim to make you look more beautiful—even though cosmeceuticals (cosmetics that purport to have druglike benefits) have skyrocketed into a multibillion-dollar industry. So before you slather on that “wrinkle-reducing” cream or swallow a “skin-rejuvenating” vitamin, find out what's in your health and beauty products with A Consumer's Dictionary of Cosmetic Ingredients. This updated and expanded edition gives you the facts you need to protect yourself and your family from possible irritants, confusing chemical names, and the exaggerated claims of gimmicky additives. With 800 new ingredients found in toiletries, cosmetics, and cosmeceuticals—everything ranging from shampoo to shaving cream, bath lotions to Botox—this alphabetically organized guide evaluates them all, and includes targeted information for children and for people of color. A Consumer's Dictionary of Cosmetic Ingredients is more indispensable than ever to anyone who cares about the health of themselves and their loved ones.

Lead in lipstick? 1,4 dioxane in baby soap? Coal tar in shampoo? How is this possible? Simple. The \$35 billion cosmetics industry is so powerful that they've kept themselves unregulated for decades. Not one cosmetic product has to be approved by the US Food and Drug Administration before hitting the market. Incredible? Consider this: The European Union has banned more than 1,100 chemicals from cosmetics. The United States has banned just 10. Only 11% of chemicals used in cosmetics in the US have been assessed for health and safety - leaving a staggering 89% with unknown or undisclosed effects. More than 70% of all personal care products may contain phthalates, which are linked to birth defects and infertility. Many baby soaps are contaminated with the cancer-causing chemical 1,4 dioxane. It's not just women who are affected by this chemists' brew. Shampoo, deodorant, face lotion and other products used daily by men, women and children contain hazardous chemicals that the industry claims are "within acceptable limits." But there's nothing acceptable about daily multiple exposures to carcinogenic chemicals -- from products that are supposed to make us feel healthy and beautiful. Not Just a Pretty Face delves deeply into the dark side of the beauty industry, and looks to hopeful solutions for a healthier future. This scathing investigation peels away less-than-lovely layers to expose an industry in dire need of an extreme makeover. 15 percent of the purchase price of each book sold benefits the national Campaign for Safe Cosmetics, administered by the Breast Cancer Fund, through December 31, 2012.

Written by principal environmental scientists for a premier environmental engineering firm, this "Glossary" describes accurately and without jargon the regulations surrounding the shipping of dangerous goods around the world. Created by the expert hosts of the popular Well-Fed Women Podcast, a step-by-step food and fitness plan for women, that teaches them how to improve their health by changing the quality—not the quantity—of the food they eat. To eat your way to better health, you don't need to limit your calorie intake, or cut out carbs or fat. You don't need to count “points.” Better health doesn't come from limits. It comes from focusing on the quality of food that you eat—not the quantity. Instead of limiting your food intake you should be enriching it, argue Noelle Tarr and Stefani Ruper. The popular hosts of the Well-Fed Women Podcast want you to focus on the good things you eat. They want to make sure you get enough food so that your body has the fuel and nourishment it needs to support a healthy, long, and energetic life. Noelle and Stefani know about eating for health firsthand. They, too, struggled with confusing and frustrating medical conditions, including infertility, digestive issues, acne, polycystic ovarian syndrome, hypothyroidism, and anemia. They discovered that the secret to improving wellness was actually more food: they ditched the diet books, calorie counters, and scales, and started eating their way to health. In Coconuts and Kettlebells, you'll eat at least 2,000 calories a day thanks to a delicious selection of dishes that are all gluten-free, grain-free, and paleo. Within those 2,000 calories, setting a minimum intakes of protein, fat, and carbohydrates instead of the usual maximums will ensure that your diet is full of nutrients, while also providing flexibility to enjoy what you're eating. Noelle and Stefani identify the Big Four foods—grains, dairy, vegetable oils, and refined sugar—that cause the most health problems among women. While many diets require you to eliminate these foods entirely, Coconuts and Kettlebells provides an easy-to-follow step-by-step program to test these foods and determine which you need to cut back on—and which you don't—to feel better. To help you discover how your body responds to the Big Four, you'll choose from two simple 4-week meal plans: one for the Butter Lover (people who tend to feel more satisfied eating higher ratios of fats) and one for the Bread Lover (people who tend to feel more satisfied eating higher ratios of carbs). Each meal plan comes with a weekly shopping list, a guide to kitchen tools and equipment, and instructions on how to batch cook, meal prep, and stock the pantry. In addition, you'll have access to over 75 gluten-free and paleo-friendly flavor-packed recipes (free of the Big Four foods) for every meal of the day, including: Coconut Chai Latte Kale and Bacon Breakfast Skillet Apple Pie Smoothie Thai Coconut Curry Shrimp Moroccan Lamb Meatballs Shrimp and Cabbage Stir Fry Parsnip and Carrot Fries Mango Jalapeno Salsa Chocolate Cherry Energy Bites Lemon Raspberry Mini Cheesecakes To go along with the meal plans, Noelle and Stefani also provide three 4-week fitness plans tailored to three experience levels: beginner, intermediate, and advanced. All of the workouts can be done anywhere—at your home or on the road—and take no more than thirty minutes. A comprehensive whole body program to get and keep you healthy inside and out, Coconuts and Kettlebells provides the knowledge and tools you need to heal in a way that is effortless, rewarding, confidence-boosting, and everlasting.
