His Excellency Benjamin Mkapa was Tanzanian's third president, elected under the first multi-party general election in Tanzania. His memoirs range from his childhood, time as president, and his continuing post-retirement involvement on the international stage of development and peace mediation. This book will appeal to readers interested in: an African's personal experiences of colonialism in East Africa; the struggle for independence by the liberation movements of several African countries; how war helped unify the diverse citizens of a young nation; fostering nationalism and addressing ethnic and religious differences; the economic and social aspects of transition to socialism and then to a free market environment; the political transition from a single party state to multi-partyism; and relations with international organisations and development partners. During the ten years of his presidency he undertook substantial reforms, such as the privatisation of national assets, securing international debt relief and restructuring the

public service. His Excellency writes of his childhood, his political maturation, the evolution of the State and politics in Tanzania, as well as some political upheavals in neighbouring countries. These memoirs are enriched by his views on leadership and advice for aspiring leaders. After Julius Nyerere, few books have been written by senior Tanzanian leaders on the evolution of Tanzania; in fact more literature has been produced by foreigners than Tanzanians, thus H.E. Mkapa's memoirs are a milestone. This book will appeal to aspiring leaders; students of development, international politics and diplomacy; those working for development partners; historians and those who want to know more about their Tanzanian heritage.

The report first reviews current literature related to the issue of winter home heating affordability & use by the independent elderly. From this review, several hypotheses are formulated for subsequent empirical analysis. The next chapter describes a sampling & survey procedure used in the analysis. The survey examined living circumstances, winter home heating costs, and income among the independent elderly in Waterloo, Ontario. This is followed by a description of the socio-economic characteristics of the sample group & a control group and the empirical analysis of the hypotheses. The re-

port concludes with a summary of the major findings and some policy recommendations concerning winter home heating among the elderly. The appendix includes an outline of federal & provincial programs that assist the elderly.

This paper discusses Tanzania's Seventh Review Under the Policy Support Instrument (PSI). Program performance under the PSI has been broadly satisfactory. Most quantitative targets for June and September 2017 were met. Although progress in structural reforms has been mostly slow, efforts have been boosted to advance them. Macroeconomic policies will need to be closely coordinated. After recording a small fiscal surplus in July-September against a programmed deficit, the government is planning to step up budget implementation, particularly in development spending. The monetary policy stance and liquidity forecasting and management will need to be closely coordinated with fiscal developments. Strong growth and job creation are needed to address high poverty and a large underemployed youth population.
