Detailed Trane Furnace Troubleshooting Your filters should be cleaned or replaced every 90 days your furnace is in use. Dust, debris, dirt, and other particles get caught in your filters and screens, which require constant attention to monitor the system. Another Trane furnace concern is when the heat goes out.

Remove loose debris and overhanging limbs to allow proper airflow. Schedule seasonal maintenance. Have your air conditioner and furnace checked out before each heating and cooling season to catch problems before it is too late. Change filters regularly. A dirty filter can severely lower your HVAC system's performance.
